**3. NEW BUSINESS**

- a. Discuss options for placement of a bridge or hand railing to assist hikers' navigating a portion of the North Loop Trail along the river. There is a section that is difficult to navigate due to steep incline and also ice conditions in the winter. Evidence of wildlife using this portion of the trail to access the river.
- b. High volume of rains has caused significant trail erosion on portions of the access roads leading into the property, past the retaining pond. This may be an issue we can discuss with the Department of Public Works to come up with a more permanent solution to repair these areas to prevent future erosion.
- c. Specific requirements of the Merrimack Conservation Commission regarding permission and placement of granite style memorial bench on the property.
  1. Request process, requirements, and responsibility of the donor.
  2. If the company delivering the bench does not have the ability to transport the bench to a specific location on the property, do we have access to equipment to relocate it once it is delivered?
