Memo

To: Paul Micali – Town Manager
From: Chief DiFronzo
CC:
Re: Abbie Griffin Funding purchase request
Date: February 28, 2022

In reviewing the Department's needs, we have determined that our rope rescue equipment on the (2) new engines is in need of an upgrade. The current ropes and related equipment are over 15 years old. If approved, all new ropes would be purchased along with new supporting equipment that would allow are firefighters to perform rope rescue tasks easier and more efficiently. Since the original purchase of this equipment, the industry has developed better equipment allowing for safer, more efficient and quicker ways of accomplishing the tasks needed for a rescue.

Attached is the breakdown of equipment we are looking to purchase for the engines. The total request is \$9,397.45.

If there are any questions, please feel free to contact me.

Sincerely,

Mark W. DiFronzo
Fire Chief

MEMO

DATE: FEBRUARY 18, 2022
TO: MEMBERS OF THE TOWN COUNCIL
CC: PAUL MICALI, TOWN MANAGER
FROM: BRIAN LEVESQUE, POLICE CHIEF
RE: 2022 ABBIE GRIFFIN MEMORIAL FUNDS

We are requesting to purchase a Law Enforcement Radar from Jamar Technologies to collect and analyze speed and traffic data from the Abbie Griffin Memorial Fund. We receive numerous requests to monitor areas for speeding vehicles. Unfortunately, due to call volume and other issues that we need to attend to, we cannot afford to have an officer sit and monitor traffic for long periods of time. We utilize our current speed signs and speed spy to monitor these areas and will generate data to determine if there is a speed concern. Often times the data shows that the average speed is within the 85 percentile of the speed limit, which shows that there is not a prevalent speeding issue on that roadway. We then share the data with the complainant. The requests come from email, phone, and Facebook Messenger but will often have to wait as our other devices are being used elsewhere. The benefit of the Law Enforcement Radar is the clean report that it generates. Our current programs produce reports that are confusing and not easy to understand. The cost of the unit is **\$4,532**.

We would also like to purchase four simunition conversion kits for our new Sig Sauer P320 XCarry pistols. As you are aware, we will be purchasing new pistols and we would like to continue to our scenario based simunition training. Simunitions is a marking round used for realistic use of force training. These conversion kits would replace the upper slide assembly including barrel of our P320 pistols to make them safe and allow them to fire the simunition round. Each kit costs \$635, for a total of **\$2,540**.

Additionally, we would like to purchase two Sig Sauer M400 semi-automatic patrol rifles equipped with sound suppressors and a red dot optics. It has been discovered that when rifles are deployed in indoor and outdoor environments, hearing loss and disorientation have become a major factor and concern for our officers and citizens' well-being. These rifles would simply replace those currently deployed in the field. To be clear, they are the same rifle platform currently deployed by our Patrol Division and SRT Officers (i.e. semi-automatic, M4 style, .556 caliber). The only difference would be the addition of a sound suppressor device. Each rifle set-up costs \$2,476.17, for a total of **\$4,952.34**.

Lastly, we would like to purchase 5 rugged rubber keyboards to use with our mobile data terminals in the cruisers. These keyboards would be easier to clean and maintain. We are currently using keyboards that were originally purchased with the MDTs approximately five years ago. Each keyboard costs \$206.95, for a total cost of **\$1,034.75**.

The total amount for the requested purchases is **\$13,059.09**.

Attention: Det. Bill Vandersyde

This letter is to inform you that **JAMAR Technologies, Inc.** is the U.S. sole source provider for the **Law Enforcement Radar Recorder [Traffic Counter System]** and the **STARNext Software Program**. The Law Enforcement Radar System will allow you to gather Volume, Speed, Vehicle classification by length along with Following Distance. No other company makes a system that works the same way or has the same features as the equipment referenced above. The hardware and software contain technology and algorithms that are not available in any other "similar" products. Jamar Technologies, Inc. developed the STARNext Software that is used with the Radar Recorder. The Law Enforcement Radar Recorder is compatible with the STARNext software which is used by multiple cities, Police Departments and Engineering firms across the United States.

Please contact me if you have any questions.

Best Regards,

Rich Cole

Making Data Collection Easier

September 19, 2019

To whom it may concern,

The STARnext software is a sole source product only available from JAMAR Technologies.

The software is coded and maintained solely by JAMAR personnel and allows for download and processing of data from the JAMAR line of radar data recorders and TRAX road tube data recorders. The use of JAMAR data recorders with the STARnext software is a unique data collection and analysis system that is only available from JAMAR Technologies.

The format of the STARnext data files is a proprietary JAMAR Technologies format and cannot be created by any other source.

The STARnext software is covered under copyright protection and the STARnext logo is registered under a federal trademark.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Michael Overholt', is written over a light blue horizontal line.
