None

New Business

Presentation by Chuck Miller:

1. the Town's Information Technology infrastructure;
2. the computer network connectivity and physical location of equipment;
3. the Town's physical plant as it relates to the Town's computers and network connections;
4. the names and functions of the core software applications which are used across departments;
5. the names and responsibilities of the Information Technology suppliers used by the Town, such as web site hosting and Internet access;
6. the network connections that go outside the Town, such as Internet and the Police connection to the State of New Hampshire and the FBI;
7. the voice telephone system used internally by the Town;
8. and the disaster recovery plan for the Town's data.
